Claims

1. A method of passivating galvanic zinc/nickel
5 coatings characterized in that the coating is treated
with an oxidizing agent.

2. The method of claim 1, characterized in that a
peroxide sulfate is used as oxidizing agent.

10 *Zn/Ni*)
3. The method of claim 1 or 2, characterized in that
a conversion coat is applied to the zinc/nickel coat.

15 *Zn/Ni*)
4. The method of claim 3, characterized in that the
conversion coat is composed of a polymer wax.

5. The method of one of the preceding claims,
characterized in that a coat of dry lubricant is
applied.
Zn/Ni)
